Education

Vellore Institute Of Technology

B.Tech ,Computer Science & Engineering — CGPA : 8.94

Sep 2021 – July 2025

Vellore , Tamil Nadu

Experience

Bristol Myers Squibb

Associate Software Developer

July 2025 – Present

Hyderabad, Telangana

- Engineered an LLM-powered chatbot to assist lung cancer patients, implementing Retrieval-Augmented Generation (RAG) architecture for personalized and context-aware medical support with 92% response accuracy.
- Developed AWS Lambda functions for automated metadata enrichment, storing results in DynamoDB to enhance data searchability and discoverability across the Catalog Connect platform.
- Enhanced the EDP Databricks Framework for scalable pipeline development and implemented parallel processing for Salesforce API workflows, reducing job processing time by 60%.

TATA Advanced Systems Limited

Software Developer Intern

Oct 2023 – Dec 2023

Noida, Uttar Pradesh

- Worked on military-grade Interactive Electronic Technical Manuals (IETM) of Level 5 software, improved technical documentation efficiency by 30%.
- Created a faceted search interface locally and globally, enabling users to filter technical documentation by 10+ parameters like component, system, or date; decreased average search time by 40%.
- Integrated HTML pages from the MySQL database, ensuring personalized content delivery and enhanced security.

Projects

EnterpriseQ | *Python, LangChain, Gemini API, ChromaDB, Embedding Models, FastAPI, Docker*

- Built a Multi-Agent LLM platform using LangChain/LangGraph with intelligent routing across SQL, RAG, and Math agents with 70% reduction in manual analysis effort
- Implemented Hybrid Search RAG pipeline (BM25 + ChromaDB) with persistent Document Catalog, auto-tagging, and LLM summaries enabling instant cross-session querying across CSV, Excel, and PDFs

HostelCare | *Node.js, Express.js, JavaScript, RESTful APIs, Redux Toolkit, React Native, MongoDB*

- Built a scalable hostel management platform with modules for cleaning, maintenance, health, and notices, supporting 5,000+ students.
- Established a user-friendly service request system that enabled students to submit and track their requests seamlessly, resulting in significantly reduced manual submission time by automating the service request system.

MentalEase | *Node.js, Express.js, JavaScript, React.js, Tailwind CSS, MongoDB, Machine Learning Algorithms*

- Developed an AI-based Mental Health Prediction System using machine learning classification techniques to analyze survey data from 1,000+ employees and achieve a prediction accuracy of 85%+.
- Applied key features such as user-friendly input forms and real-time predictions, enhancing mental health tracking, and facilitating preventive decision-making for workplace well-being.

Technical Skills

Languages: Python, JavaScript/TypeScript, C++, SQL

Frameworks: React.js, Node.js, Express.js, FastAPI, LangChain, LangGraph, Redux, Tailwind CSS

AI/ML & Data: LLM Integration, RAG Pipelines, ChromaDB, Scikit-learn, Databricks

Databases & Cloud: MongoDB, PostgreSQL, MySQL, AWS, Docker

Tools & Concepts: Git/GitHub, Postman, CI/CD, Agile, DSA, OOP, DBMS

Certifications And Achievements

- IEEE Published: "Biometric-Based User Authentication via Behavioral Analysis" — SISIMPACT, 2025
- Certified in Artificial Intelligence and Machine Learning in collaboration with Google.
- Microsoft Certification in Azure AI Fundamentals.
- Selected as one of the Top 3 ideas in Start-up Street 7.0 for the Education System.
